Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

1. Delete claims 17-28 and 34-38 for being drawn to non-elected inventions based on the response filed September 18, 2009. It is noted that while Applicant elected with traverse, Applicant failed to respond to the arguments presented by the Examiner in the Office Action mailed December 31, 2009 deeming the requirement to be proper and made final.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance.

It is the opinion of the examiner that the art of record (considered as a whole) neither anticipates nor renders obvious "the projections being disposed in at least one recess which is structured to prevent marks of the projections to be transferred to the heated metal plate material" in combination with the rest of the claimed limitations set forth in claim 29.

Gates (US Patent # 6,539,765) discloses an apparatus for press molding a heated metal plate material [see col. 5 lines 7-10] comprising of a supply piping arrangement (36, 37) provided in a mold (8, 9) and configured to interact with a cooling medium [see col. 5 lines 22-23], and ejection holes (opening at the exit of supply piping) providing in a molding surface of the mold (8, 9) and configured to interact with the cooling medium, wherein the supply piping and the ejection holes communicating with one another [see col. 5 lines 22-31; figure 2].

Tamada (JP Patent 06-210370) discloses a metallic mold for press forming having a plurality of projections (located adjacent to each recess) on at least one portion of part of the molding surface of a mold (2) wherein the plurality of projections have an area ratio between 1% and 90%, a diameter between 18 μm and 120 μm and a height between 1 μm and 10 μm in order to prevent the formation of defects on the work piece during the pressing operation [see paragraph 0013 of translation].

The prior art, neither alone nor in combination, anticipated or renders obvious to claimed invention and no motivation is found to modify the prior art to obtain the claimed invention. To modify the prior art to obtain a mold with a plurality of projections disposed in at least one recess because Tamada fails to disclose nor teach of providing projections disposed within a recess.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
